Available for a January to April 2027 co-op work term

[Date]

[Hiring contact name]

[Firm name]

[City, Province]

Dear [Hiring contact name],

I am applying for the [exact posting title], WaterlooWorks posting [ID], at [firm name]. I am a second-year Accounting and Financial Management student at the University of Waterloo, available full time from January to April 2027. I have already worked a complete Canadian personal tax season, preparing and reviewing 200+ T1 returns in DT Max, so I can be billable in the first week of the term rather than the fourth.

The work your team would care about is published rather than claimed. Flagged in Hindsight runs the Beneish M-Score ex ante on five Canadian frauds and reports that none of the three computable test years crossed the standard cut-off, with the script and inputs published so the result can be re-run and attacked. My IFRS 15 trainer carries 62 revenue scenarios verified against Part I of the CPA Canada Handbook, and it separates what the standard settles from what it leaves to judgment. Both rest on the habit a tax file teaches: agree the figure to its source first. [One sentence naming this team's mandate.]

Everything above is published at alexrajcoomar.github.io, where every figure names its source, every derived number is labelled as derived, and the build refuses to publish if a number does not match the data behind it. I would rather be checkable than impressive, and I expect to be asked how I know something.

I would welcome the chance to discuss the role with you. I can be reached at a2rajcoo@uwaterloo.ca or (647) 471-3023.

Sincerely,

Leesharam (Alex) Rajcoomar
